## Adding a Personal External Account

Your private accounts at other financial institutions can be linked to Online Banking with Seaside Bank and Trust so you can transfer money between two banks without ever leaving home! When you go to add another account, you are asked to verify your ownership of that account by confirming two small deposits Seaside Bank and Trust makes into the external account.

### Add An External Account

This form will enable you to request that an external account (an account you have at another financial institution) be linked for electronic transfers.

There are two steps in this process:

- **Step 1: Add Your Account**
- **Step 2: Verify Your Account**

Please input the routing number and your account number located on your check (see the sample check below). If you want to add a savings account, please contact your financial institution for the routing number that they use for savings deposits. Also verify if your account is eligible for ACH transactions as not all savings accounts allow for ACH transactions. If you have issues with your micro deposit showing up in your account, verify the routing number with the other financial institution as not all financial institutions have one routing number for all account types.

**Step 1: Add Your Account**

To begin, you will need to input the following information about the account you would like to add:

- Institution's Routing Number
- Your Account Number
- Account Type (checking or savings)

Once this information has been entered, click on the Continue button.

Two "micro" deposits will be generated and sent to your external account (typically within 5 business days). Micro deposits are random deposits in amounts less than \$1. Once you have received these two micro deposits in your external account, make note of both amounts as you will need them later in step 2, the verification process.

- **Please Note:** Only domestic (U.S.) banks are allowed.
- If the micro deposits do not appear in your account within the specified timeframe, contact the other financial institution to verify that you are using the correct routing number as some institutions do not use a single number for all account types.

**Step 2: Verify Your Account**

In the **Transfer Funds** tab, click **Add External Account**.

1. Enter the account number.
2. Select the type of account using "Account Type" drop-down.
3. Enter the financial institution's routing number. These numbers are located at the bottom of a paper check or deposit slip from your checkbook.
4. Click the **Continue** button.

In two to three business days, two micro-deposits will appear in your external account. Once you receive those deposits, go to the **Verify External Account** tab to add the account.

## Verifying a Personal External Account
